| Sister Antoinette | Asks for continual prayer concerning arthritis pain and fibromyalgia that she experiences since undergoing two past surgeries. The pain has been worsening of late and has become more frequent in which affects her sleep at night due to sudden feelings of severe pain and bodily cramps that she has to attend to. Sister Antoinette shares that it is such a relief when the pain is over and that she has much joy. This affliction has kept her humble and closer to the Lord. She knows that we only have a little while longer 'til all suffering is ended. She is very grateful that she has a very large threshold for pain. She does not complain, but would appreciate our prayers for relief of the pain if it be God's will. | 10/01/2019 |
| Sister Suzan      | Prayer request from Larry: He left work early yesterday [Friday, 09/27/2019] due to feeling sick and awoke quite sick with a really bad sinus headache, the worst he's ever had. He feels like an arrow is piercing through his left eye. He's inhaling peppermint and eucalyptus oils, some relief but wishes for our prayers for cure as he cannot think or focus.                                                                                                                                                                                                                                                                                                                                                                        | 10/01/2019 |

| Sister Antoinette | Asks that we keep her family in prayer, specifically for there to be more family involvement in reaching out to her brother. That the Lord would impress the hearts of their family members to call, visit, and/or be willing to help out her brother.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 10/01/2019 |
